

OKEECHOBEE CITY

All roads lead to this straight point—at the intersection of two trunk line railways, 2 state highways, the western terminus of Connors Highway and at the head of Lake Okeechobee—surrounded by thousands of acres of the most fertile lands on earth, millions of feet of virgin pine timber. Every advantage of transportation facilities, rich back country, ideal climate, pure water, high and dry—everything to insure a healthy, prosperous and permanent growth.

What will an investment there be worth to you a year from today? The shrewdest investors in real estate are buying Okeechobee City Lots by the block. A number have resold at a handsome profit in less than a week. Others are riding the rising tide of increased values.

This is your golden opportunity to buy now at the original prices fixed by the owners before the new railroads and highways were built in and directly through the property.

1,500 lots and 15,000 acres to select from.

Call and reserve space in our Free Bus to Okeechobee City.
