

DEVELOPMENTS

at

ARE IN FULL SWING

Sincere in their belief that genuine and whole-hearted development work is one of the first requisites of the intelligent investor, the men behind Okeechobee Shores are devoting their utmost efforts to this end. And the progress already made is well deserving of mention.

The grading of such streets as Berkshire Place, Devonshire Place, Regent Place, Hyde Park Place, Oxford Place and others is already completed. Monday saw the beginning of work on the 100-foot wide Florida Boulevard and the construction of Seaboard Boulevard is soon to commence. With such work as this already under way and with plans in store for the widening of Conners to a sixty-six foot boulevard, for the erection of hotels, schools, clubs, beautiful homes, an electric light and water plant, the realization of Okeechobee Shores as the master city of Inland Florida is indeed assured.

And as the future assures great things for Okeechobee Shores, so also does it assure generous rewards to those so fortunate as to become part owners of this great enterprise.
